

CONFIDENTIAL

29 MAY 1979

MEMORANDUM FOR: Deputy to the DCI for Collection Tasking
Deputy Director for National Foreign Assessment

FROM: Director of Central Intelligence

SUBJECT: Monitoring SALT ☐

25X1

1. When SALT II goes into effect, we are going to be called upon periodically to confirm whether or not we believe the Soviets are living up to its provisions. It seems to me this would require NFAC to develop a Community plan for sharing the workload and analyzing the Soviet behavior and reporting on it. Further, it seems to me it would require Collection Tasking to dovetail under that plan with a specific collection plan. Perhaps this latter already exists and we are doing everything we need to do, but it would be worth checking.

2. It further occurs to me that we should be prepared to tell the Senate how we're going to go about both collection and analysis.

3. Finally, it also occurs to me that SALT II is virtually in effect now and perhaps we should put these plans into effect now.

4. All portions of this memorandum are classified CONFIDENTIAL.
